

UNLIMITED POSSIBILITIES HINGE ON ONE GREAT IDEA.

Patented Matelock® Design.

Our great idea makes the difference between a random collection of serving carts and an integrated, modular serving system: The Galley® System.

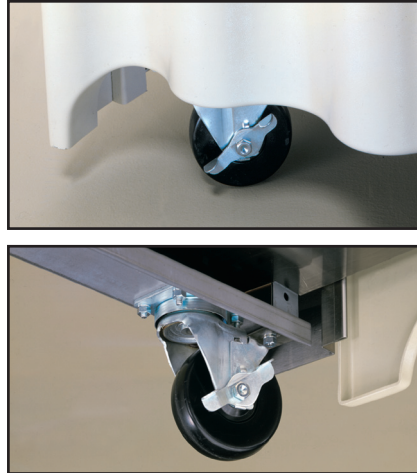

Just push the modules together and snap—the exclusive Matelock latching system aligns and locks the service line. There's no exposed hardware, nothing to snag your customer's clothing.

To unlock modules, simply grab the handle and pull to one side. Now you can reconfigure the Galley System any way you want: buffet, cafeteria, speed line, soup and salad bar.

Totally independent units.

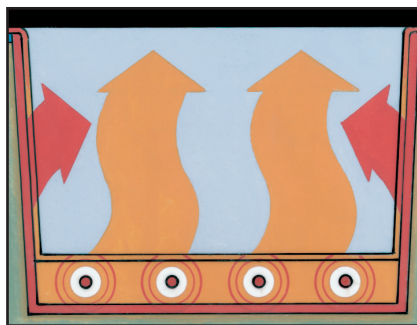

Each module in the Galley System functions independently. Each has its own lighting, heating and cooling controls—neatly hidden away and tamper-resistant. When storage is needed for foods, baskets and trays, it's provided, plentifully.

Hidden, locking casters.

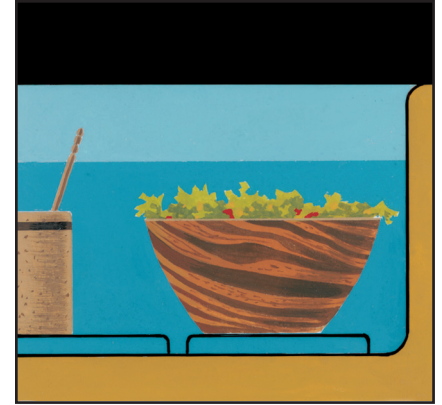

Concealed plate casters make the Galley System look permanent. Lock the caster brakes and it acts permanent, too, until you're ready to set up a new line at a moments notice.

Energy-saving hot wells.

Our patented, high-efficiency hot well comes standard with the Galley System. It heats from the bottom and both sides, uses one-half to two-thirds less energy than conventional wells.

All kinds of cold.

Standard Cold Pan (5" deep) uses ice, but is also available with refrigeration. Deep Cold Pan (10") keeps a steady 40°F with built-in cooling. Exclusive Galley combination module holds 38°F on one side and -10°F on the other.

Long-lasting good looks.

The Galley System is beautifully functional. Module bodies are tough, flame retardant ABS plastic—virtually dent-proof. The finish goes all through; can't flake, peel or chip off.

Neutral colors complement any decor. The decorator panels come in rich walnut, light oak or teak woodgrain at no extra cost. Or you can customize panels to match or contrast tablecloths, draperies, wall coverings or carpeting.

Whatever you serve and wherever, the Galley System gives you the versatility and flexibility to meet changing needs and keep your customers coming back. Again and again and again.
